

THE FOUNDATION OF LUXURY

From the inception of Redwood, luxury has been a priority. We pride ourselves in offering industry leading features and technology that bring luxury to the forefront. Redwood holds the distinction of being the only RV company started from the ground up by THOR Industries. The product of highly-experienced minds in the RV industry, Redwood has quickly become a flagship for luxury fifth wheels.

We at Redwood believe that greatness is in the details. From the FIT 2.0 Chassis designed specifically to encompass the foundation of luxury, to the iN-Command smart automation system that gives users complete control from the palm of their hand, Redwood is bringing these details to you. Redwood has and will continue to rely on owners and fellow RVers to help shape and define Redwood from generation to generation. Many of the exclusive features Redwood has offered from the beginning were formed by direct input from full-timers and can be found nowhere else. Our continuous commitment to research, development, and customer feedback is what defines our past, present, and future.

Thank you for considering The Foundation of Luxury.

At the Root of Every Redwo

WELDED HITCH RECEIVER

FIT's integrated hitch receiver can haul 3,000 pounds of additional cargo.

FALCON BRAND AXLES

- Falcon 8,000 lb. axles are built to last and offer many advantages over the competition:
- Upgraded 3 3/8" brakes improve stopping time up to 50% and lower maintenance costs.
 - Powder-coated axle tubes protect against corrosion.
 - EZ-Lube hubs allow for quick and easy maintenance.
 - 6 year warranty

16 PLY 17.5 H RATED TIRES WITH ALUMINUM WHEELS

8 Lug Bearcat aluminum wheels provide the high-end look and ride that each Redwood deserves.

UPGRADED LRE 4100 SUSPENSION SYSTEM WITH WET BOLT

MORryde has designed the LRE system to complement the steel leaf spring suspension. The rubber shear springs isolate and absorb road shock as well as provide 4" of suspension travel. 25% more suspension dampening.

STEP ABOVE ENTRY STEP

The Step Above features the most solid aluminum step available. It also provides a more secure entry and exit of the coach and is designed to rest on the ground when fully extended, providing a solid, safe RV step system.

*All of these features are standard on your Redwood RV

A CUSTOM FIT™ FOR YOU

Falcon Integrated Technology (FIT™ 2.0) ensures quality down to the smallest of details. All components of the FIT™ chassis system are sourced from industry leading manufacturers, producing one of the industry's most sought-after foundations.

ood is a FIT™ 2.0 Foundation

DROP FRAME

- Allows for larger compartment doors
- More overall storage availability

HYDRAULIC SLIDE-OUT SYSTEM

The gold standard for hydraulic slide-out systems, Falcon provides years of worry-free operation and makes us distinct among the competition.

THE FALCON FRAME

The Falcon Frame utilizes the very best materials available and represents the best the industry has to offer:

- Powder coated frame for protection
- Heavy-duty 12" I-Beam main rails
- 10" I-Beam drop frame for increased storage capacity.

6-PT. HYDRAULIC AUTO LEVEL

Gone are the days of boards, blocks, and backaches. Every Redwood comes standard with a fully-automatic 6-pt. hydraulic Level Up system, accented with LED's. With the touch of a button (and in less than a minute), you can be leveled and ready to relax. When you're ready to go again, a memory function returns the pin box to the height of your truck's hitch.

FLEX AIR PIN BOX

The Flex Air® Pin Box provides the smoothest towing quality in the industry. The integrated air bag, rubber compound and the oil filled shock absorber reduce chucking and the vertical tug-of-war between your 5th wheel and truck. Superior 5th wheels make the Flex Air pin box standard.

Additionally, having a custom chassis system from industry leaders allows for the use of many industry firsts. This keeps the features and technology of the FIT™ chassis at the forefront of the best the RV industry has to offer.

Control • Systems Monitoring • Safety

The latest advancement, iN-Command Global Connect™ allows you to control select function of your RV using your smart device from anywhere in the world.

FINALLY A SYSTEM YOU CAN TRUST.

iN-Command embraces the next generation of controls for your Redwood RV by acting as the central hub of operations and puts you at the helm using your preferred smart device. But how does this all-encompassing system work? What, exactly, does it monitor and control? Let's take a closer look at iN-Command piece by piece.

Body Control Module

At the core of iN-Command is the control board, or "brain" of the system, the Body Control Module. The main board, itself, is protected by an impact resistant cover. The inside of this cover features detailed connection labeling, along with the wiring guide.

The Display Commander is your primary point of contact with iN-Command. All of the switches and monitoring panels that have cluttered up interior walls in the past are integrated into this one sleek, touch screen monitor. What really makes the Display Commander stand out, however, is that it can be controlled remotely with a smart device using the free JENSEN iN-Command mobile app. This app performs all of the same functions as the Display Commander, but from the convenience of your mobile device.

REAL TEMPERATURE TESTED!

ALL NEW HIGH GLOSS WOOD FINISH

All new high gloss wood finish comes standard in every Redwood RV. This mirror like finish on our Pacific Cherry cabinets is made possible through a seven step, sanding process. Each piece of cabinetry is built and inspected by hand to eliminate mass machining. The biscuit corners are glued and nailed to give these cabinets ultimate strength and durability. The finished product has the highest sheen rating available to give you a truly residential look.
